

# We use SmartSync®.

## If we had known that SmartSync® would make it so much easier for us to work together, we would have switched a long time ago.

“This statement is an allusion to a phrase which was coined by tennis player Jimmy Connors back in the days when he switched from a wooden to a chrome tabular steel racket and which came to my mind after we had introduced SmartSync® in combination with AuditTemplate\* and AuditAgent\* at our firm. Since then, we haven’t had any problems working synchronously as a team across multiple locations. As SmartSync® runs silently in the background, users won’t even notice it’s there. We greatly benefit from the advantages of SmartSync®, such as the fact that our data are always up to date no matter where we are working. Not only does the software cause AuditTemplate\* to run more smoothly, it also helps us ensure that all colleagues involved in an audit can access the current data anytime and anywhere.

Easy and efficient to work with, SmartSync® is the perfect complement to AuditAgent\* and AuditTemplate\*.”

SmartSync is a registered trademark of CaseWare International Inc. ([www.caseware.com](http://www.caseware.com)).

\*AuditAgent and AuditTemplate are products by Audicon for the German market and are based on CaseWare Working Papers and Audit International Template, both registered trademarks of CaseWare International Inc.
