

Data ReBase

Version 3.0

With the new release the Data ReBase client data centers are migrated from Azure Germany Telekom Data Centers to the new **Microsoft Azure Global Data Centers**. Thus all Data ReBase users are going to benefit from **security and compliance standards** comparable to European data centers.

Data ReBase is now also available as a **German version**.

Scheduled Maintenance Downtime

Data ReBase unavailable from March 11th to March 13th, 2020

Due to the upgrade to and implementation of the new version the Data ReBase cloud service will be unavailable between **09:00 a.m. on March 11th** and **10:00 p.m. on March 13th** (local time).

Migration to Microsoft Azure Global Data Centers

Data ReBase client data centers are migrated to Microsoft Azure Global Data Centers

As a Data ReBase client you can now benefit from the security improvements and the new location as all client data is moved to the Microsoft Azure Global Data Center. The new data center offers many advantages:

- Worldwide standards in the two locations Frankfurt and Berlin
- Client data are stored in Frankfurt and data replication for backup and recovery is located in Berlin
- Geographic redundancy
- Security and compliance standards as in European data centers

Downtime during migration

To secure a seamless and smooth data migration the downtime of the Data ReBase cloud service is considerably longer than usual. We apologize for any inconveniences.

The Data ReBase cloud service will be unavailable between **09:00 a.m. on March 11th** and **10:00 p.m. on March 13th** (local time). Please consider the downtime while planning your work.

In case you have scheduled any specific work at this time or you require access to your data, please notify us in advance so we can accommodate the migration accordingly. Send an email to axel.becker@audicon.net if you have any questions.

Old TaxMart Cloud instances are retired

Note that old URLs which you might have had access to during testing phases or when setting up your first TaxMart cloud projects are **no longer available**.

The following URLs are retired:

- taxmart-cloud.audicon.net
- taxmart-portal.audicon.net

Please make sure to remove any references to these old URLs in your internal documentation.

The valid URLs are:

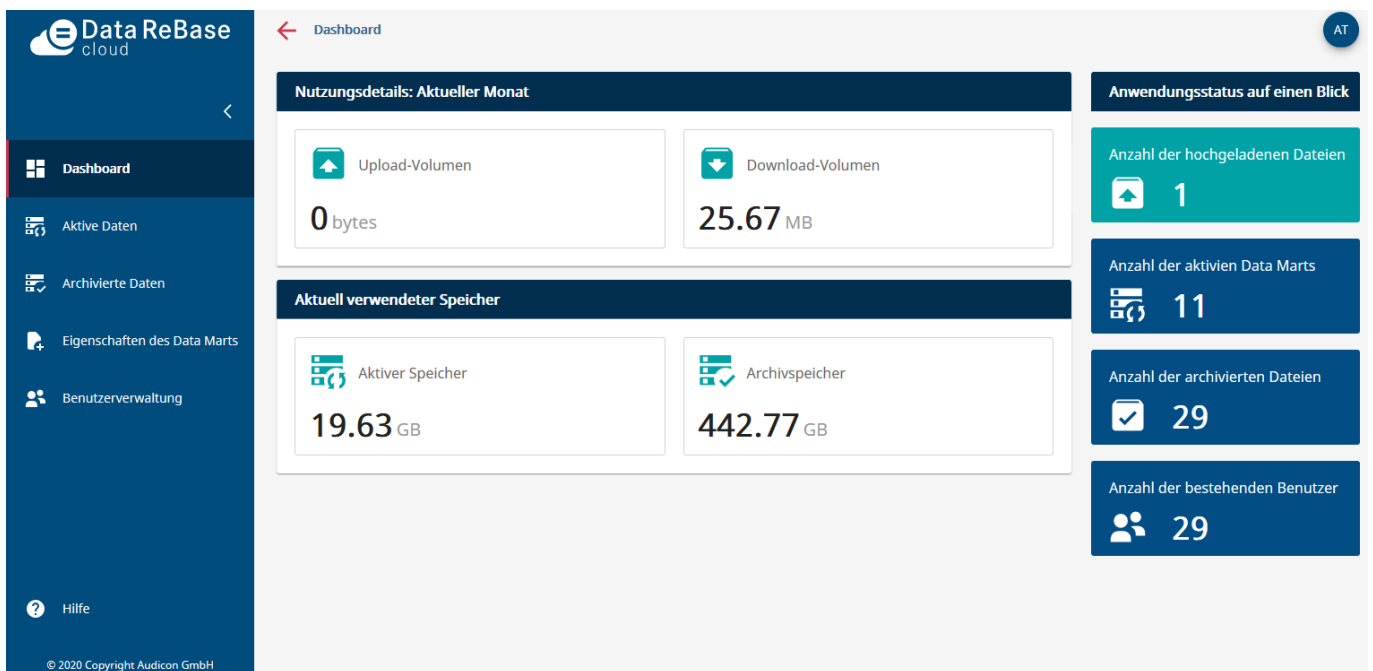

- management.data-rebase.com
- portal.data-rebase.com

If you are not sure which URL you should use as of now, please send an email to axel.becker@audicon.net.

German Version of Data ReBase

Data ReBase cloud and Audicon Portal with German user interface

Both Data ReBase cloud service and Audicon Portal tenant management are now available as a German version. It will encourage the use of the application within the German speaking departments of your company. The additional language facilitates the collaboration between English and German speaking company locations and will therefore enhance efficiency while working across different departments.

Data ReBase Dashboard

Enhancements

Display of legal notice

Some clients want to show a legal notice to their users on account activation to make them aware of specific company regulations e.g. on data privacy.

Data ReBase version 3.0 provides the option to enter a legal notice in a container so that the legal notice can then be displayed in HTML format to each company user when the user logs in for the first time during account activation.

Contact your consultant for more information on how to integrate a legal notice.

Improved user experience

It is now easier to work and navigate in the data grid as the currently selected row in the grid is highlighted and you can quickly spot the information even on a page with many data elements.
