

# Spotlight on Audicon

Audicon GmbH is the leading provider of software solutions, methodical and technical know-how and services for audit, risk and compliance. The solutions are designed for auditors and tax accountants, compliance and risk managers as well as controllers and treasurers.

## **Audicon: know-how and consulting in the areas of audit, risk and compliance since 1994**

Excellent, comprehensive service is – and has been since 1994 – of the highest priority to Audicon. For 25 years we have been assisting our customers in the successful accomplishment of their tasks. Along with sophisticated and up-to-date software this requires experience, methodical knowledge and expertise as well as technical competence. A broad range of services completes our offer. It includes professional seminars and workshops as well as consulting services which are tailored to suit your needs.

Audicon greatly values close customer relationships: Regular customer events held by Audicon have become important industry meeting points and a good way for specialists to get together. In addition, Audicon participates as an exhibitor and contributor at numerous external specialist events and advises visitors on site regarding current specialist subjects and the appropriate software solutions. Audicon maintains offices in Dusseldorf and Stuttgart (Germany) as well as in Cluj (Romania) and has a well-established worldwide sales and cooperation network at its disposal.

## **Market position**

Top-quality products and services as well as personal customer service pay off – this is proven by Audicon's strong market position.

All auditing firms included in the Lünendonk® lists of 2019 (B2B service provider rankings published by the German market research and consulting company Lünendonk & Hossenfelder) as well as the Big Four rely on Audicon software solutions such as the data analysis software solution IDEA or AuditSolutions for the optimization of their audit processes and the accomplishment of their tasks. Over 90 out of the 120 largest German companies by revenue also rely on Audicon software solutions.

Audicon has been supporting auditors and treasurers in the area of local authority auditing with regard to double-entry annual financial statements for over ten years.

Furthermore, Audicon software solutions are also used by over 30,000 customs and tax auditors. They use IDEA and AIS TaxAudit Professional/App TaxAudit Professional – the official data analysis software solutions used by the German Fiscal Administration since 2002 – for their digital tax audits.

The software is used internationally: The four biggest auditing firms worldwide – the Big Four – also rely on software solutions by Audicon.
